

PRIYANSHU

Full Stack Developer · Data Enthusiast

📍 Bangalore | 📞 +91 9071048836 | ✉️ showlittlemercy@gmail.com | 🔗 LinkedIn
🌐 Portfolio | 🐙 GitHub | 📷 Instagram

Profile Summary

Innovative **Full Stack Developer** specializing in building scalable, production-grade applications using **Next.js**, **TypeScript**, and **Python**. Proven expertise in architecting secure systems with real-time capabilities and complex database schemas. Adept at integrating **Cloud solutions** and **Generative AI** to drive technical innovation and business value.

Experience

PAT Technologies Private Limited (Edutainer)

Web Development Intern

Bangalore, India

Feb 2026 – May 2026

- Designed and developed highly interactive, full-stack web applications utilizing Next.js and React.
- Architected scalable backend services and secure database solutions powered by Supabase.
- Crafted highly responsive and modern user interfaces with Tailwind CSS to ensure seamless cross-device user experiences.
- Credentials:** [Completion Letter] | [Certificate]

Corizo Edutech Pvt. Ltd

AI, ML, Data Science & Web Development Intern

Bangalore, India

Oct 2025 – Feb 2026

- Completed four specialized technical tracks: Artificial Intelligence, Machine Learning, Data Science, and Web Development.
- Conducted exploratory data analysis (EDA) using Python (Pandas, NumPy) and built deep learning models via TensorFlow.
- Engineered responsive web components using JavaScript frameworks, significantly improving UI performance and load times.
- Credentials:** [AI] (Jan'26–Feb '26) | [ML] (Dec '25–Jan '26) | [DS] (Nov '25–Dec '25) | [Web] (Oct '25–Nov '25)

Selected Projects

Palettes | Supabase, Polygon, Razorpay, Make.com, Render, Vercel [Working Link](#) [GitHub](#)

2026

- Engineered an India-based investor and borrower platform featuring multiple dedicated portals (Admin, Blogger, HR) and live chat models.
- Integrated Razorpay for seamless payments, Polygon blockchain, Google APIs, and automated workflows using Make.com; deployed via Render and Vercel.
- Report:** [Platform Report]

SERJI (AI-Powered Platform) | AI Integration, Full Stack [Working Link](#) [GitHub](#)

2026

- Developed a comprehensive AI suite comprising three main tools: AI Resume & Portfolio Analyzer, Smart Code Debugger, and an AI-Powered Expense Tracker with actionable insights.
- Reports:** [Resume Analyzer] | [Code Debugger] | [Expense Tracker]

NIRVANA | Next.js 14, Clerk, Supabase [Working Link](#) [GitHub](#)

2025

- Architected a full-stack e-commerce platform featuring a custom admin dashboard for dynamic inventory management and role-based access control.
- Optimized database interactions for high-traffic product rendering and integrated secure cart state management with a seamless checkout flow.

Twist | Next.js 14, Clerk, Supabase, PostgreSQL [Working Link](#) [GitHub](#)

2025

- Spearheaded the development of a full-scale social media platform as a major **Final Year Capstone Project**, mirroring complex Instagram-like functionalities.
- Architected a secure data layer by integrating Clerk authentication with Supabase Row Level Security (RLS) to enforce strict privacy across user profiles and feeds.

Daiser | Next.js 14, TypeScript, Supabase, React Query [Working Link](#) [GitHub](#)

2025

- Engineered a production-grade task management workspace featuring an interactive Kanban board with seamless drag-and-drop capabilities.
- Implemented optimistic UI updates and real-time analytics visualization, optimizing server-state synchronization for a latency-free user experience.

Technical Skills

Languages : Python, JavaScript, C++, SQL, MongoDB, HTML5, CSS

Frameworks : React.js, Next.js, Node.js, FastAPI, Pandas, Scikit-Learn, Tailwind CSS

Cloud & Tools : AWS, Azure, Google Cloud, Render, Vercel, Supabase, Clerk, Make.com, Cloudflare, GoDaddy, Git, Google Colab

Web3 & Blockchain : Polygon, Solana, Ethereum (Mainnet, Devnet)

Concepts : Data Structures & Algorithms, Machine Learning, REST APIs, RLS Security

Education

Visvesvaraya Technological University (HKBK College of Engineering)

Bachelor of Engineering in Computer Science

Bangalore, India

2022 – 2026

- Credentials:** [Course Completion Certificate] | [Character Certificate]

Sri Chaitanya Techno School

Class XII

Bangalore, India

2022

Army Public School

Class X

Bangalore, India

2020

Certifications

Data & ML: Machine Learning (Python) [\[Link\]](#) · DS & Algo (Python) [\[Link\]](#) · Basics of DSA [\[Link\]](#) · Hadoop Starter [\[Link\]](#) · Business Analysis Basics [\[Link\]](#)

Web & Cloud: Intro to Front End [\[Link\]](#) · Intro to HTML [\[Link\]](#) · Cloud Computing [\[Link\]](#) · Azure Fundamentals [\[Link\]](#) · AWS for Beginners [\[Link\]](#)

Generative AI & Design: Intro to GenAI Studio [\[Link\]](#) · Intro to GenAI [\[Link\]](#) · UI/UX Basics [\[Link\]](#) · Intro to Graphic Design [\[Link\]](#) · Digital Transformation [\[Link\]](#)

Publications & Leadership

Publication: “Cloud-Based Social Media Platforms: Architectures & Future Trends” – Intl. Journal of IJISRT (2025) [\[Open PDF\]](#)

Event Organizer: Managed a 2,000+ attendee college fest; oversaw logistics, budgeting, and team coordination.
